

#### TECHNIQUE (SOUND)

INFO: The artist synthesizes sounds on very low frequencies.

#### POWER AMPLIFIER (PA system)

Minimum: two (2) TOPS and two (2) sub-basses.

#### INDOOR

up to 150 spectators	> power: 2,5 - 3,5 kW
up to 500 spectator	> power: 6 - 10 kW
1000 and more spectators	> power: 20 kW

#### OUTDOOR

up to 500 spectators	> power: 20 kW
1000 and more spectators	> power: 30 kW

Please note: **Don't use any do-it-yourself construction! Thank you!**

#### SCREEN and PROJECTOR

##### OUTDOOR – SCREEN

Costs depend on the venue's size and capacity. A medium or large projection screen is inevitable. We recommend an AIRSCREEN classic (inflatable movie screen).

##### OUTDOOR – PROJECTOR

We know from experience that consumer electronics don't fulfill the requirements.

Suitable projectors: Sanyo PLC XF60, EPSON EMP-8300 NL, NEC MT 1075.

Furthermore: opto-mechanical devices from EIKI and others, 5.000 ANSI lumens minimum.

Please don't hesitate to contact us. We will be happy to advise you.
